- MEAN and LAMP stack
- Mongo and MySQL
- JavaScript Enthusiast
- UX and UI experience
- OOP concepts
- Honest and upfront
- PHP experience
- Git lover
- Angular and JS frameworks
- Creative problem solver
- 3.85 GPA
- Quick learner
- Strong communication skills
- Great design sense
- Passionate and hardworking
- Bootstrap wizard
- WordPress experience

Projects:

Spinny Notes

The challenge for this project was to create a node application with MVC architecture that used at least one API and had full CRUD implementation. I decided to create a notes application where users could create their own custom notebooks as well as custom notes.

Baldwin's Books

The challenge for this project was to create a fully functioning Laravel e-commerce site on a team of 2 other developers. The project lasted about 2 weeks and gave me a lot of experience working in the MEAN stack. I got lots of experience with oauth, routing, and the stripe payment API.

Dots

The challenge for this project was to create an interactive game with full MVC architecture using only vanilla Javascript. I had a ton of fun with this and it gave me the opportunity to fine-tune my Javascript skills without being able to fall back on any kind of framework or external tool.

Secret Show

The Secret Show website was my first experience working with a real client. The Secret Show was a student film project aiming to create a TV show pilot that is going to be pitched to Adult Swim. The website takes advantage of Angular and Firebase to keep up with user input.

Education:

2017

Bachelor of Science in Web Design and Development
Full Sail University - Orlando, FL, United States
